PART C:	GRAMMAR	10 MARKS
PART D:	WRITTEN EXPRESSION	30 MARKS
<b>TOTAL</b>		<b>80 MARKS</b>

## **PART A: READING COMPREHENSION [20 MARKS]**

*Read the following passage below and answer the questions that follow. Write your answers in the answer booklet provided.*

*This is a speech that was delivered by the Acting Secretary for Education- Dr Joseph Pagelio*

### **National School of Excellence Policy**

This is the school of Excellence Policy (SoEP) for the Papua New Guinea (PNG) Department of Education. The Policy will provide the focus and direction for building highly intellectual and specialist skilled manpower needed to take PNG into the next century.

PNG experienced huge economic booms from 1900s to 1960s. The first economic boom was recorded in 1900s (copra plantations and spice trade, the second was recorded in 1930s (Wau/Bulolo gold field, Gulf oil extraction, Highlands Gold extraction) and the third recorded boom was in the 1980s (Bougainville copper and OK Tedi Mining).

The extraction of these resources generated millions and billions of dollars under the colonial administration and the PNG pre-independence government (Batten, 2009). During this period, the colonial government earnings did not translate into tangible investment in human resources programs. Despite those massive earnings (1905-1980) there was still a huge number (200,000) of school aged-children not in school in that period (DoE, Corporate Data, 1973). Investment in secondary, vocational and technical schools as well as the development of highly skilled scientific and technological skilled work force was wanting.

After 14 years of reform implementation since 1995, there have been many successes in all areas of access, curriculum and monitoring, teacher education and training and management. The reform program is continued to be implemented under the National Education Plan 2005-2014. While access has been increased significantly, quality education is concern especially the course structure and infrastructure at the secondary and national high school levels because the government has been mainly concentrating on basic education.

The National Government has now realized the significance to develop our country's human resources to become highly intellectual and skilled to be able to compete at the regional, national and international market through the introduction of the School of Excellence concept.

The Government was made aware that the country lacks highly intellectual and skilled manpower to participate meaningfully in the Liquefied Natural Gas (LNG) projects and also other mining, agriculture, marine and fisheries developments taking place.

Therefore, in 2009, the National Executive Council (NEC) in its meeting in Wabag, Enga Province approved the School of Excellence (SoE) concept. It approved the current National High Schools to begin the SoE concept.

This concept will mean a lot for Papua New Guinea if successfully implemented. It will also lead to Papua New Guinea becoming self-reliant in producing many of the products that we have been importing from overseas like cars, computers, laptops, mobile phones, cars, boats, etc.

For Papua New Guinea to move forward and be competitive at the national, regional and international levels, we must start somewhere. The SoE is the way forward. We cannot remain the same for another 50 years. We must set the benchmark now for our future generations to follow.

I am pleased that this Policy is now completed and will pave the way for the implementation of the concept to begin. I call on all our stakeholders to come forward and assist us to successfully implement the concept.

The development of this Policy has been the result of intensive work by the SoE Committee. I acknowledge the efforts of the Committee and all our other stakeholders who have contributed in one way or another to finalize this Policy.

Children are the focus of our work in the education system. We must make sure that we provide them with quality resources and a conducive environment and atmosphere to achieve high academic results in their field of study.

### **QUESTIONS [20 MARKS]**

- 1 Does the article above contain a political, economical or policy message? **[1 mark]**
- 2 List down two examples of companies that contributed mostly to the economic boom in the eighties as suggested in the article. **[2 marks]**
3. What did the Department of Education lack in achieving before 1980? **[4 marks]**
4. Which area did the Department of Education experience its successes? **[4 marks]**
5. How does the National Government want to improve the country's human resources? **[1 mark]**
- 6 What is the major factor lacking in the current education system? **[2 marks]**
- 7 What is the main group now that the education system is targeting? **[1 mark]**
- 8 How does the proposed concept by the Acting Secretary hope to help this main group? **[3 marks]**
